Full Stack Web Developer

SUMMARY

I'm an Experienced full-stack web developer skilled in designing and building scalable web applications. Proficient in HTML, CSS, JavaScript, React, Node.js/Express, and MongoDB. Strengths include mentoring junior developers, cross-functional collaboration, and effective communication. Naturally analytical, I enjoy solving complex problems and continuous learning. Outside work, I find inspiration in nature and exploring new ideas.

TECHNICAL SKILL

- ☐ *Frontend :* HTML, CSS, JavaScript, Tailwind CSS, Reactjs
- ☐ *Backend :* Nodejs, Express
- ☐ *Database :* Mongodb
- ☐ *Tools* : Git, Postman, Github, Vs code

PROJECTS

1. Temu-Inspired E-Commerce Web Application
   Developed a modern e-commerce web app inspired by Temu's shopping

experience and user interface. The platform allows users to sign up, browse products, manage their cart, and complete test payments using Paystack integration. It demonstrates strong implementation of authentication, dynamic product rendering, and smooth user interaction across pages.

Key Features: Login/Sign-up authentication · Product shopping page · Add-to-cart functionality · Checkout page · Paystack test payment integration

Tech Stack: HTML, CSS, JavaScript, React, Node.js, Express, MongoDB

Live view: https://temu-clone-zayn.vercel.app

2. Recipe Finder Application

Created a responsive recipe application that helps users search and explore various meal recipes with ease. The app includes a filtering system for quick recipe discovery and a detailed view page for full preparation steps. Focused on clean design, efficient search, and seamless navigation for better user experience.

Key Features: Recipe search and filter · Detailed recipe page with full instructions

Tech Stack: HTML, CSS, JavaScript, React
